CSCI 23300 – Minor Capstone
Upcoming deadlines

Last class and final presentations: May 18th (2 weeks)

Final presentation requirements:

- Minimum 10-minute presentation, plus questions

- Present yourself: what is your major, why you chose to minor in computer science.

- Give an overview of the project, including:
    o What was project about? What data did you work on?
    o Recap the goals you set for yourself at the beginning of the semester.

- Give a technical description of the project:
    o How did you use TKinter, SQL, Python?
    o What tools did you write? (do not show code)
    o What problems did you face and overcome (or not)?

- Integrate a demo of your project at some point during the presentation. I recommend towards the end of the presentation.

- Conclude with: lessons learned, possible expansions of the project, random thoughts…

Don't hesitate to go into details in any section you find interesting or wish to expand upon (we have class time available).

Final report and project wrap-up: due May 25th (3 weeks)

Requirements:
- Finalize the code and sync it to github.
  (make it readable to me, so add comments)

- Include a Tutorial.pdf that explains to a *non-technical* user how to use your project. (include pictures)
  - Imagine you are explaining to someone how to use your project.

- Include a Documentation.pdf that gives a *technical* description of your project:
  - Imagine you are explaining to someone how to *modify* your project.

- Include a Project_Report.pdf that expands upon all the points of the final presentation.
